

American Sailing Association (ASA) Coastal Navigation Class

March 7, 14, 21, 28 (11 a.m. - 5 p.m.)

A great winter sail education experience!

For the past eight years we've offered the ASA Coastal Navigation course. This is a very popular class. It always fills to capacity, it's fun, and it's very educational.

You will learn to use traditional coastal navigation tools and publications. You will learn to determine your location with nautical charts using bearings and fixes. You will learn how to plan coastal voyages. And you will learn to use electronic navigation equipment.

The class is held Sundays in March (at the **Kansas City Sailing** shop in Lawrence). Lunch is provided. The cost is \$275 and this includes 24 hours of classroom time, course materials, ASA certification, food, and beverages.

Please contact Bruce Liese (913-579-5039 or bruce@KansasCitySailing.com) to enroll. This class fills up quickly so reserve your spot today.

This is a great way to build your skills as a sailor, even when the temperatures are below freezing!
